PROFESSIONAL SUMMARY

Frontend Developer specialising in AI-powered product interfaces and agentic workflows. Led frontend architecture for an LLM-based CPG platform, shipping features like dynamic AI content generation, agentic chat systems, and real-time streaming UIs. Strong track record delivering measurable outcomes —**70%** faster manual workflows, **40%** load speed improvement — across early-stage startups.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript,TypeScript , ReactJS, NextJs, Redux, Tailwind CSS, ContextAPI, Zustand, Tanstack
Backend: NodeJS, ExpressJS, MongoDB, REST API, WebSockets, MySQL, Supabase, AWS S3
AI / LLM: OpenAI API, Vercel AI SDK, Prompt Engineering, Agentic UI
Tools: Git, GitHub, Figma

PROFESSIONAL EXPERIENCE

Lead Frontend Developer *May 2025 - Present*
Evolve AI *Remote*

- Led the entire frontend architecture of an agentic CPG platform, improving SEO and reducing UI-related defects by **30%**.
- Built a dynamic Sell Sheet Generator that auto-populates product data from user profiles and applies it to pre-designed templates, reducing manual creation time by **70%**.
- Integrated streaming agentic chat interface, handling SSE-based response rendering and CNAME-based conversation tagging — increasing message retrieval efficiency by **45%**.
- Built a stakeholder relationship workflow (send/accept connection requests), resulting in a **40%** increase in cross-team engagement on the platform.
- Improved perceived load speed by **40%** through aggressive prefetching, route-level caching, and polished skeleton screens for a smoother user experience.

Frontend Developer *May - December 2025*
Studio 137 Digital Media Solutions (Intern → Full-time) *Remote*

- Designed and implemented **10+ interactive assessment screens** using React, improving user completion rates by **35%**.
- Built dynamic, state-driven components for MCQs, progress tracking, and conditional question flows across multiple assessment types.
- Improved performance and cross-device UX through responsive layouts and custom hooks, reducing load time by **25%**.

Full Stack Developer *Aug 2024 - Dec 2024*
Payr *Remote*

- Increased partner engagement by **40%** by building seamless API integrations that enabled external organizations to contribute content directly to the platform.
- Reduced server load by **20%** by integrating AWS S3 for cloud-based file handling, improving backend performance and scalability.

PROJECTS

AI Workspace - *Next.js, TypeScript, Supabase, OpenAI, TanStack Query, Zustand* - Link

- Engineered an AI-powered workspace enabling users to create notes, upload documents and interact with contextual AI assistants through a modern chat interface.
- Developed secure authentication, document management, and collaborative workspace features using Supabase Auth, Database, Storage, and Realtime services.
- Optimized frontend performance through route prefetching, code splitting, and efficient data-fetching strategies, delivering a fast and responsive user experience.

TicketParse - *React, ExpressJS, NodeJS, PDF.js* - Link

- Designed a flexible parser supporting 10+ ticket formats, achieving 99% accuracy in output formatting across varied PDF structures.
- Developed a backend service to parse PDF content into structured API responses, optimizing frontend state management by **40%**.

ACHIEVEMENTS

Ranked **3rd among top contributors in Vinyasa Summer of Code**, with 250+ contributions and 80+ merged pull requests.

EDUCATION

DataTrained *Oct 2022 - Dec 2023*
Full Stack Development Course *CGPA: 9.2*

Deen Dayal Upadhyaya College (DU) *Aug 2019 - Sept 2022*
Bachelor with Honors in Zoology *CGPA: 8.3*
